UNITED STATES FOREIGN TRADE

SUMMARY REPORT  
FT 950-E

SEPTEMBER 1961

FOR RELEASE  
November 15, 1961

## EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic and foreign merchandise (unadjusted for seasonal variation) from \$1,652.7 million in August to \$1,616.3 million in September<sup>1</sup> reflected lower levels of exports to all areas except Latin American Republics. Changes in the dollar values of area totals from August to September are as follows: Western Europe, from \$581.8 to \$553.9 million; Canada, from \$299.8 to \$298.5 million; Latin American Republics, from \$286.0 to \$293.3 million; and "all other countries," from \$485.1 to \$470.7 million. These totals include data on exports of Special Category commodities which were valued at \$143.7 million in September as compared to \$146.7 million in August.

With Special Category commodities excluded, exports of domestic and foreign merchandise fell from \$1,506.0 million in August to \$1,472.7 million in September. Exports to O.E.E.C. countries fell, during the period, from \$477.5 to \$466.0 million while increases were reported in exports to sterling area countries, from \$232.8 to \$245.9 million and Latin American Republics,

from \$274.4 to \$283.1 million. Exports to all continents, except South America, decreased during the period.

Exports to Europe fell from \$513.5 million in August to \$483.4 million in September reflecting, in part, lower levels of exports to individual countries of this continent as follows: Yugoslavia, from \$25.7 to \$15.7 million; Switzerland, from \$28.9 to \$20.4 million; Italy, from \$63.0 to \$55.7 million; West Germany, from \$88.4 to \$82.0 million; Netherlands, from \$56.4 to \$50.2 million; Portugal, from \$7.6 to \$3.5 million and Union of Soviet Socialist Republics, from \$3.8 to \$0.2 million. These decreases were partly offset, however, by an increase in exports to the United Kingdom, from \$84.1 to \$108.5 million. The decline in exports to Asia, from \$300.3 to \$293.0 million, was mainly the result of decreases in exports to Japan, from \$139.4 to \$132.7 million and India, from \$29.2 to \$24.6 million. A decrease in exports to Australia, from \$32.7 to \$27.3 million, was the chief factor in the drop in exports to Australia and Oceania from \$38.7 to \$32.5 million. Exports to Africa decreased slightly from \$65.2 to \$62.9 million. September exports to North America, valued at \$411.4 million were slightly below the August total of \$411.7 million.

<sup>1</sup>See the September 1961 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding M.S.P. (military) shipments. Seasonally-adjusted data are not available for total exports including M.S.P. (military) shipments or by country of destination.

During the period, exports to South America climbed from \$176.5 to \$184.5 million primarily as a result of an increase in exports to Colombia, from \$16.3 to \$21.0 million.

### EXPLANATION OF STATISTICS

**COVERAGE:** Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as part of the United States export trade. Merchandise shipped in-transit through the United States between foreign countries is not included in export statistics.

**COUNTRY DEFINITION:** Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

**VALUATION:** The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost

if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

**EFFECT OF SAMPLING:** The value of export shipments individually valued at \$100-\$499 (about five percent of total export value) is estimated by sampling. Effective with the statistics for January 1960, the previous sample ratio of 10 percent was increased to a 50 percent sample for countries other than Canada with the 10 percent sample being retained for Canada. The estimated values are distributed among the area, continent and country totals. For the 1960 and 1961 export figures in this report, the probable variability due to sampling is less than \$50,000 or less than one percent. The largest variation from rounding of figures is \$50,000. For further information regarding sampling procedures, see the September 1953, February 1954, January and June 1956, and the October-December 1959 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE, BY COUNTRY OF DESTINATION:  
SEPTEMBER 1961 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. Figures for 1961 are as originally issued and have not been revised to include published corrections. Figures for 1960 include revisions published with the December 1960 reports, or earlier, but do not include revisions published during 1961. See "Explanation of Statistics" for information on sampling procedures and effect thereof on the data shown.)

<sup>a</sup>Latin American Republics. <sup>b</sup>Sterling area countries. <sup>c</sup>Western Europe. <sup>d</sup>O.E.E.C. (Organization for European Economic Co-operation) countries. \*Indicates less than \$50,000. <sup>1</sup>For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. <sup>2</sup>Country detail is not reported in the export statistics for Special Category commodities beginning July 1950 for security reasons. For certain areas, export totals include Special Categories, as shown at the beginning of the table. Export figures for other areas and countries represent total exports less exports of Special Category commodities. During 1960, security restrictions were removed for certain aviation fuels and lubricating oils. All totals shown in this report reflect the declassification of these commodities. See the January 1961 issue of Report No. FT 410 for a list of Special Category commodities. During 1960 security restrictions were also removed for all forms of uranium, thorium, special nuclear material, and deuterium oxide (heavy water). The 1960 totals shown in this report have not been revised to include data on these commodities but data for these commodities are included in the 1961 totals. <sup>3</sup>Includes \$74.5 million of Military Mutual Security Program shipments (\$30.4 million to Western Europe). <sup>4</sup>Includes \$71.5 million of Military Mutual Security Program shipments (\$28.2 million to Western Europe). <sup>5</sup>Includes \$53.5 million of Military Mutual Security Program shipments (\$25.5 million to Western Europe). <sup>6</sup>Includes \$79.1 million of Military Mutual Security Program shipments (\$33.3 million to Western Europe). <sup>7</sup>As explained in the April 1958 issue of Foreign Trade Statistics Notes, this is an arbitrary category established with April 1958 statistics to cover certain shipments to unidentified countries in Western Europe. <sup>8</sup>Country designation established effective July 1960. Formerly French Equatorial Africa. <sup>9</sup>Country designation established effective July 1960. Formerly French West Africa and Republic of Togo. <sup>10</sup>Country designation established effective July 1960. Formerly Belgian Congo. <sup>11</sup>Country designation established effective July 1960. Includes areas formerly known as "Somaliland" and "British Somaliland." The data shown for periods prior to July 1960 reflect combined totals on United States export trade with Somaliland and British Somaliland. <sup>12</sup>Country designation established effective July 1960. Formerly Madagascar.
